TRANSMITTAL OF SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is a Supplemental Information Disclosure Statement disclosing information which has come to the attention of applicants and/or their attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(c), the enclosed Statement is being filed before the mailing date of either a final action or a notice of allowance and is accompanied by credit card payment form in the amount of One Hundred Eighty Dollars (\$180.00) to cover the fee set forth in 37 C.F.R. § 1.17(p).

Neither applicants nor their attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or §

103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08a "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08a (for applications filed after June 30, 2003), except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. Applicants have two translations of the Abstract of European Patent Application No. EP 0861760 A2 published September 2, 1998. These translations are reproduced below:
The First abstract was obtained from e-space and discloses the following: a container for a folded air bag and a gas generator is flexible. It has a textile material sector with a rectangular base part, which in the complete container forms the bottom and the front and rear walls. There are two

side parts connected to the main part, which in the complete container form the side walls and a cover for the container aperture. The side parts partly overlap each other in the closed position. One side part has a slit in the overlap region and the other has a tab on the end to fit in the slit.

The second is a rough in-house translation by an uncertified translator and discloses the following: a flexible container is suggested for storing folded up Airbags and a tubular gas inflator, which is characterized by a textile material section with an essentially rectangular base (1) that forms the floor (1a) in the finished container as well as the front wall and the rear wall (1b, 1c) and two textile side parts (2, 3) connected with the base (1), which form the side panels and a cover closing the container opening at the finished container, whereby the side parts (2, 3) in closing position are arranged partly overlapping each other and whereby a side part (2) within the overlap range exhibits a slot (4) and the other side part (3) finally, a latch (5) that may be put through the slot (4), is put through the slot (4), whereby a connection is created between the side parts (2, 3) in the lap range that is releasable upon inflation of the Airbags.

Respectfully submitted,

Craig J. Madson
